## Non-GAAP Financial Disclosure and Reconciliation

In addition to evaluating the financial condition and results of our operations in accordance with GAAP, from time to time management evaluates and analyzes results and any impact on the Company of strategic decisions and actions relating to, among other things, cost reduction, growth, and profitability improvement initiatives, and other events outside of normal, or "core," business and operations, by considering certain alternative financial measures not prepared in accordance with GAAP. These measures include "Adjusted leverage ratio," "Adjusted income from operations," "Adjusted net income," " Adjusted operating margins," and "Adjusted diluted earnings per share ("EPS")." Further, management assesses the organic growth of our revenue and gross profit on a same store basis. We believe that our assessment on a same store basis represents an important indicator of comparative financial performance and provides relevant information to assess our performance at our existing locations. Same store amounts consist of information from dealerships for identical months in each comparative period, commencing with the first month we owned the dealership. Additionally, amounts related to divested dealerships are excluded from each comparative period. Non-GAAP measures do not have definitions under GAAP and may be defined differently by and not be comparable to similarly titled measures used by other companies. As a result, any non-GAAP financial measures considered and evaluated by management are reviewed in conjunction with a review of the most directly comparable measures calculated in accordance with GAAP. Management cautions investors not to place undue reliance on such non-GAAP measures, but also to consider them with the most directly comparable GAAP measures. In their evaluation of results from time to time, management excludes items that do not arise directly from core operations, or are otherwise of an unusual or non-recurring nature. Because these non-core, unusual or non-recurring charges and gains materially affect Asbury's financial condition or results in the specific period in which they are recognized, management also evaluates, and makes resource allocation and performance evaluation decisions based on, the related non-GAAP measures excluding such items. In addition to using such non-GAAP measures to evaluate results in a specific period, management believes that such measures may provide more complete and consistent comparisons of operational performance on a period-over-period historical basis and a better indication of expected future trends. Management discloses these non-GAAP measures, and the related reconciliations, because it believes investors use these metrics in evaluating longer-term period-over-period performance, and to allow investors to better understand and evaluate the information used by management to assess operating performance.

The following tables provide reconciliations for our non-GAAP metrics:
