FORM 10-Q

☒ **QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the quarterly period ended March 31, 2013

OR

☐ **TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the transition period from _____ to _____

Commission file number: 001-31262

ASBURY AUTOMOTIVE GROUP, INC.

(Exact name of Registrant as specified in its charter)

Delaware

(State or other jurisdiction of
incorporation or organization)

01-0609375

(I.R.S. Employer
Identification No.)

2905 Premiere Parkway NW, Suite 300
Duluth, Georgia

(Address of principal executive offices)

30097

(Zip Code)

(770) 418-8200

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act:

Large Accelerated Filer	<input checked="" type="radio"/>	Accelerated Filer	<input type="radio"/>
Non-Accelerated Filer	<input type="radio"/>	Smaller Reporting Company	<input type="radio"/>

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date: The number of shares of common stock outstanding as of April 23, 2013 was 31,166,841.

ASBURY AUTOMOTIVE GROUP, INC.
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

1. DESCRIPTION OF BUSINESS

We are one of the largest automotive retailers in the United States, operating 97 franchises (76 dealership locations) in 18 metropolitan markets within 10 states as of March 31, 2013. We offer an extensive range of automotive products and services, including new and used vehicles; vehicle maintenance, replacement parts and collision repair services; and financing, insurance and service contracts. As of March 31, 2013, we offered 29 domestic and foreign brands of new vehicles. Our current brand mix is weighted 85% towards luxury and mid-line import brands, with the remaining 15% consisting of domestic brands. We also operate 25 collision repair centers that serve customers in our local markets.

Our retail network is made up of dealerships operating primarily under the following locally-branded dealership groups:

- Coggin dealerships, operating primarily in Jacksonville, Fort Pierce and Orlando, Florida;
- Courtesy dealerships operating in Tampa, Florida;
- Crown dealerships operating in New Jersey, North Carolina, South Carolina and Virginia;
- Nalley dealerships operating in Atlanta, Georgia;
- McDavid dealerships operating in Austin, Dallas and Houston, Texas;
- North Point dealerships operating in Little Rock, Arkansas;
- Plaza dealerships operating in St. Louis, Missouri; and
- Gray-Daniels dealerships operating in Jackson, Mississippi.

Our operating results are generally subject to changes in the economic environment as well as seasonal variations. Historically, we have generated more revenue and operating income in the second and third quarters than in the first and fourth quarters of the calendar year. Generally, the seasonal variations in our operations are caused by factors related to weather conditions, changes in manufacturer incentive programs, model changeovers and consumer buying patterns, among other things.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The accompanying condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP"), and reflect the consolidated accounts of Asbury Automotive Group, Inc. and our wholly owned subsidiaries. All intercompany transactions have been eliminated in consolidation. In addition, certain reclassifications of amounts previously reported have been made to the accompanying Condensed Consolidated Financial Statements in order to conform to current presentation. These reclassifications have no effect on previously reported net income.

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities as of the date of the financial statements and the reported amounts of revenues and expenses during the periods presented. Actual results could differ materially from these estimates. Estimates and assumptions are reviewed quarterly and the effects of any revisions are reflected in the condensed consolidated financial statements in the period they are determined to be necessary. Significant estimates made in the accompanying condensed consolidated financial statements include, but are not limited to, those relating to inventory valuation reserves, reserves for chargebacks against revenue recognized from the sale of finance and insurance products, certain assumptions related to intangible and long-lived assets, reserves for insurance programs, reserves for certain legal or similar proceedings relating to our business operations, realization of deferred tax assets and reserves for estimated tax liabilities.

In the opinion of management, all adjustments (consisting only of normal, recurring adjustments) considered necessary for a fair presentation of the condensed consolidated financial statements as of March 31, 2013, and for the three months ended March 31, 2013 and 2012, have been included. The results of operations for the three months ended March 31, 2013 are not necessarily indicative of the results that may be expected for any other interim period, or any full year period. Our condensed

consolidated financial statements should be read together with our consolidated financial statements and the notes thereto contained in our Annual Report on Form 10-K for the year ended December 31, 2012.

Contracts-In-Transit

Contracts-in-transit represent receivables from third-party finance companies for the portion of new and used vehicle purchase price financed by customers through sources arranged by us. Amounts due from contracts-in-transit are generally collected within two weeks following the date of sale of the related vehicle.

Revenue Recognition

Revenue from the sale of new and used vehicles (which excludes sales tax) is recognized upon the latest of delivery, passage of title, signing of the sales contract or approval of financing. Revenue from the sale of parts, service and collision repair work (which excludes sales tax) is recognized upon delivery of parts to the customer or at the time vehicle service or repair work is completed, as applicable. Manufacturer incentives and rebates, including manufacturer holdbacks, floor plan interest assistance and certain advertising assistance, are recognized as a reduction of new vehicle cost of sales at the time the related vehicles are sold.

We receive commissions from third-party lending and insurance institutions for arranging customer financing and from the sale of vehicle service contracts, credit life insurance and disability insurance, and other insurance, to customers (collectively "F&I"). We may be charged back ("chargebacks") for F&I commissions in the event a contract is prepaid, defaulted upon or terminated. F&I commissions are recorded at the time a vehicle is sold and a reserve for future chargebacks is established based on historical chargeback experience and the termination provisions of the applicable contract. F&I commissions, net of estimated chargebacks, are included in Finance and Insurance, net in the accompanying Condensed Consolidated Statements of Income.

Earnings per Common Share

Basic earnings per common share is computed by dividing net income by the weighted-average common shares outstanding during the period. Diluted earnings per common share is computed by dividing net income by the weighted-average common shares and common share equivalents outstanding during the period. For all periods presented, there were no adjustments to the numerator necessary to compute diluted earnings per share. As of March 31, 2013, we had outstanding warrants that, upon exercise, may result in the issuance of approximately 0.4 million shares of our common stock at an exercise price of \$44.74 per share. Since the warrants are required to be settled in shares of common stock, the premium received for selling the warrants was recorded as an increase to additional paid-in capital, together with any cash that would be received upon exercise. The shares issuable upon exercise of these warrants could potentially dilute basic earnings per share in the future; however, these shares were not included in the computation of diluted earnings per share in any period presented because their inclusion would have been anti-dilutive.

Discontinued Operations

Certain amounts reflected in the accompanying Condensed Consolidated Balance Sheets have been classified as Assets Held for Sale or Liabilities Associated with Assets Held for Sale, with such classification beginning on the date that the assets and associated liabilities were first considered held for sale.

We report franchises and ancillary businesses as discontinued operations when it is evident that the operations and cash flows of a franchise or ancillary business being actively marketed for sale will be eliminated from our on-going operations and that we will not have any significant continuing involvement in its operations. We do not classify franchises as discontinued operations if we believe that the cash flows generated by the franchise will be replaced by expanded operations of our remaining franchises within the respective local market area.

Amounts in the accompanying Condensed Consolidated Statements of Income for the three months ended March 31, 2012 have been reclassified to reflect the results of franchises sold or closed subsequent to March 31, 2012 as if we had classified those franchises as discontinued operations for all periods presented.

Statements of Cash Flows

Borrowings and repayments of floor plan notes payable to a lender unaffiliated with the manufacturer from which we purchase a particular new vehicle ("Non-Trade"), and all floor plan notes payable relating to pre-owned vehicles (together referred to as "Floor Plan Notes Payable-Non-Trade"), are classified as financing activities on the accompanying Condensed Consolidated Statements of Cash Flows, with borrowings reflected separately from repayments. The net change in floor plan notes payable to a lender affiliated with the manufacturer from which we purchase a particular new vehicle (collectively

referred to as “Floor Plan Notes Payable - Trade”) is classified as an operating activity on the accompanying Condensed Consolidated Statements of Cash Flows. Borrowings of floor plan notes payable associated with inventory acquired in connection with all acquisitions are classified as a financing activity. Cash flows related to floor plan notes payable included in operating activities differ from cash flows related to floor plan notes payable included in financing activities only to the extent that the former are payable to a lender affiliated with the manufacturer from which we purchased the related inventory, while the latter are payable to a lender not affiliated with the manufacturer from which we purchased the related inventory. Repayments of Floor Plan Notes Payable - Trade associated with divestitures are classified as an operating activity. Repayments of Floor Plan Notes Payable - Non-Trade associated with divestitures are classified as a financing activity.

Loaner vehicles account for a significant portion of Other Current Assets. We acquire loaner vehicles either with available cash or through borrowings from manufacturer affiliated lenders. Loaner vehicles are initially used by our service department for only a short period of time (typically six to twelve months) before we seek to sell them. Therefore, we classify the acquisition of loaner vehicles and the related borrowings and repayments as operating activities in the accompanying Condensed Consolidated Statements of Cash Flows. The cash outflow to acquire loaner vehicles is presented in Other Current Assets in the accompanying Condensed Consolidated Statements of Cash Flows. Borrowings and repayments of loaner vehicle notes payable are presented in Accounts Payable and Accrued Liabilities in the accompanying Condensed Consolidated Statements of Cash Flows. When loaner vehicles are taken out of loaner status they are transferred to used vehicle inventory, which is reflected as a non-cash transfer in the accompanying Condensed Consolidated Statements of Cash Flows. The cash inflow from the sale of loaner vehicles is reflected in Inventories in the accompanying Condensed Consolidated Statements of Cash Flows.

Recent Accounting Pronouncements

During the first quarter of 2013, we adopted an accounting standard regarding the presentation of comprehensive income. This update was issued to improve the reporting of reclassifications out of Accumulated Other Comprehensive Income ("AOCI"). The update requires that significant items reclassified out of AOCI be presented in one place in the condensed consolidated financial statements. The adoption of this standard update did not have a significant impact on our condensed consolidated financial statements.

3. INVENTORIES

Inventories consisted of the following:

	As of	
	March 31, 2013	December 31, 2012
	(In millions)	
New vehicles	\$ 556.6	\$ 517.4
Used vehicles	109.6	94.6
Parts and accessories	37.7	36.5
Total inventories	<u>\$ 703.9</u>	<u>\$ 648.5</u>

The lower of cost or market reserves reduced total inventory cost by \$4.7 million as of March 31, 2013 and December 31, 2012. In addition to the inventories shown above, we had \$6.6 million of inventories as of December 31, 2012, classified as Assets Held for Sale on the accompanying Condensed Consolidated Balance Sheet as they were associated with a franchise held for sale. As of March 31, 2013 and December 31, 2012, certain automobile manufacturer incentives reduced new vehicle inventory cost by \$6.8 million and \$6.3 million, respectively, and reduced new vehicle cost of sales from continuing operations for the three months ended March 31, 2013 and March 31, 2012 by \$5.9 million and \$5.4 million, respectively.

4. ASSETS AND LIABILITIES HELD FOR SALE

Assets and liabilities classified as held for sale include (i) assets and liabilities associated with discontinued operations held for sale at each balance sheet date and (ii) real estate not currently used in our operations that we are actively marketing to sell and the related mortgage notes payable, if applicable.

During the three months ended March 31, 2013, we sold one franchise (one dealership location). There were no assets or liabilities associated with pending dispositions as of March 31, 2013. Assets and liabilities associated with pending dispositions totaled \$18.4 million and \$9.4 million, respectively, as of December 31, 2012.

Real estate not currently used in our operations that we are actively marketing to sell totaled \$9.1 million as of March 31, 2013 and December 31, 2012. There were no liabilities associated with our real estate assets held for sale as of March 31, 2013 or December 31, 2012.

A summary of assets held for sale and liabilities associated with assets held for sale is as follows:

	As of	
	March 31, 2013	December 31, 2012
	(In millions)	
Assets:		
Inventories	\$ —	\$ 6.6
Property and equipment, net	9.1	20.7
Goodwill	—	0.3
Total assets	9.1	27.6
Liabilities:		
Floor plan notes payable—non-trade	—	5.4
Accrued liabilities	—	4.0
Total liabilities	—	9.4
Net assets held for sale	\$ 9.1	\$ 18.2

5. LONG-TERM DEBT

Long-term debt consists of the following:

	As of	
	March 31, 2013	December 31, 2012
	(In millions)	
8.375% Senior Subordinated Notes due 2020	\$ 200.0	\$ 200.0
7.625% Senior Subordinated Notes due 2017	143.2	143.2
Mortgage notes payable bearing interest at fixed and variable rates	130.3	118.9
Capital lease obligations	3.8	3.9
	477.3	466.0
Less: current portion	(4.9)	(4.6)
Long-term debt	\$ 472.4	\$ 461.4

During the three months ended March 31, 2013, we entered into one fixed rate mortgage note payable which was collateralized by the related real estate at one of our owned dealership locations. The initial principal amount of the mortgage note payable was \$12.5 million. In connection with our entrance into this mortgage note payable, we paid approximately \$0.1 million in debt issuance costs, which were capitalized and are being amortized to Other Interest Expense over the terms of the related mortgage note payable.

6. FINANCIAL INSTRUMENTS AND FAIR VALUE

In determining fair value, we use various valuation approaches, including market, income and/or cost approaches. Accounting standards establish a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available. Observable inputs are inputs that market participants would use in pricing the asset or liability developed based on market data obtained from independent sources. Unobservable inputs are inputs that reflect our assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The hierarchy is broken down into three levels based on the reliability of inputs as follows:

Level 1-Valuations based on quoted prices in active markets for identical assets or liabilities that we have the ability to access.

Level 2-Valuations based on quoted prices in markets that are not active or for which all significant inputs are observable, either directly or indirectly. Assets and liabilities utilizing Level 2 inputs include cash flow swap instruments and exchange-traded debt securities that are not actively traded or do not have a high trading volume.

Level 3-Valuations based on inputs that are unobservable and significant to the overall fair value measurement. Asset and liability measurements utilizing Level 3 inputs include those used in estimating fair value of non-financial assets and non-financial liabilities in purchase acquisitions and those used in assessing impairment of manufacturer franchise rights.

The availability of observable inputs can vary and is affected by a wide variety of factors. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment required to determine fair value is greatest for instruments categorized in Level 3. In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement is disclosed is determined based on the lowest level input that is significant to the fair value measurement.

Fair value is a market-based measure considered from the perspective of a market participant who holds the asset or owes the liability rather than an entity-specific measure. Therefore, even when market assumptions are not readily available, our assumptions are set to reflect those that market participants would use in pricing the asset or liability at the measurement date. We use inputs that are current as of the measurement date, including during periods of significant market fluctuations.

Financial instruments consist primarily of cash, contracts-in-transit, accounts receivable, cash surrender value of corporate-owned life insurance policies, accounts payable, floor plan notes payable, subordinated long-term debt, mortgage notes payable and interest rate swap agreements. The carrying values of our financial instruments, with the exception of subordinated long-term debt, approximate fair value due either to their short-term nature or existence of variable interest rates, which approximate market rates. The fair market value of our subordinated long-term debt is based on reported market prices which reflect Level 2 inputs. Level 2 inputs are valuations based on quoted market prices in markets that are not active or do not have a high trading volume. A summary of the carrying values and fair values of our 8.375% Senior Subordinated Notes due 2020 (the "8.375% Notes") and our 7.625% Senior Subordinated Notes due 2017 (the "7.625% Notes") is as follows:

	As of	
	March 31, 2013	December 31, 2012
	(In millions)	
<u>Carrying Value:</u>		
8.375% Senior Subordinated Notes due 2020	\$ 200.0	\$ 200.0
7.625% Senior Subordinated Notes due 2017	143.2	143.2
Total carrying value	<u>\$ 343.2</u>	<u>\$ 343.2</u>
<u>Fair Value:</u>		
8.375% Senior Subordinated Notes due 2020	\$ 223.0	\$ 221.5
7.625% Senior Subordinated Notes due 2017	147.1	147.5
Total fair value	<u>\$ 370.1</u>	<u>\$ 369.0</u>

We have an interest rate swap agreement which had a notional principal amount of \$19.4 million as of March 31, 2013. This swap is designed to provide a hedge against changes in variable interest rate cash flows through maturity in October 2015. The notional value of this swap is reducing over the remaining term to \$16.1 million at maturity. This interest rate swap qualifies for cash flow hedge accounting treatment and does not, and will not, contain any ineffectiveness.

Information about the effect of derivative instruments on the accompanying Condensed Consolidated Statements of Income, including the impact on AOCI (in millions):

For the Three Months Ended March 31,	Derivative in Cash Flow Hedging Relationships	Results Recognized in AOCI (Effective Portion)	Location of Results Reclassified from AOCI to Earnings	Amount Reclassified from AOCI to Earnings—Active Swaps	Amount Reclassified from AOCI to Earnings—Terminated Swaps	Ineffective Results Recognized in Earnings	Location of Ineffective Results
2013	Interest rate swaps	\$—	Swap interest expense	\$(0.1)	\$(1.1)	\$—	N/A
2012	Interest rate swaps	\$(0.1)	Swap interest expense	\$(0.1)	\$(1.2)	\$—	N/A

On the basis of yield curve conditions as of March 31, 2013, we anticipate that the amount expected to be reclassified out of AOCI into earnings in the next 12 calendar months will be a loss of \$1.0 million.

Fair value estimates reflect a credit adjustment to the discount rate applied to all expected cash flows under the swap. Other than that assumption, all other inputs reflect Level 2 inputs.

Information about amounts reclassified out of AOCI	(In millions)
Accumulated other comprehensive loss—December 31, 2012	\$ (1.6)
Change in fair value of cash flow swaps	0.1

* The total fair value of our swap is a \$0.6 million net liability, of which \$0.3 million is included in Accounts Payable and Accrued Liabilities and \$0.3 million is included in Other Long-Term Liabilities, respectively, on the accompanying Condensed Consolidated Balance Sheet.

7. DISCONTINUED OPERATIONS AND DIVESTITURES

During the three months ended March 31, 2013, we sold one franchise (one dealership location) that was classified as discontinued operations. The accompanying Condensed Consolidated Statements of Income for the three months ended March 31, 2012 have been reclassified to reflect the status of our discontinued operations as of March 31, 2013. Operating expenses in the table below include rent and other expenses of idle facilities previously associated with businesses sold or closed prior to March 31, 2013.

The following tables provide further information regarding our discontinued operations as of March 31, 2013, and includes the results of businesses sold prior to March 31, 2013:

	For the Three Months Ended March 31,	
	2013	2012
	(In millions, except franchise data)	
Franchises:		
Mid-line import	1	1
Luxury	—	3
Total	1	4
Revenues	\$ 3.8	\$ 35.3
Cost of sales	3.4	29.1
Gross profit	0.4	6.2
Operating expenses	0.9	5.5
Impairment expenses	—	—
(Loss) income from operations	(0.5)	0.7
Other expense, net	(0.1)	—
Gain on disposition	14.6	—
Income before income taxes	14.0	0.7
Income tax expense	(5.4)	(0.3)
Discontinued operations, net of tax	\$ 8.6	\$ 0.4

8. SUPPLEMENTAL CASH FLOW INFORMATION

During the three months ended March 31, 2013 and 2012, we made interest payments, including amounts capitalized, totaling \$10.6 million and \$10.2 million, respectively. Included in these interest payments are \$2.9 million and \$2.5 million of floor plan interest payments for the three months ended March 31, 2013 and 2012, respectively.

During the three months ended March 31, 2013 and 2012, we made income tax payments, net of refunds received, totaling \$0.8 million and \$0.3 million, respectively.

During the three months ended March 31, 2013 and 2012, we sold \$4.2 million and \$5.2 million, respectively, of trade receivables, each at a total discount of \$0.1 million.

During the three months ended March 31, 2013 and 2012, we transferred \$16.7 million and \$13.5 million, respectively, of loaner vehicles from Other Current Assets to Inventory on our Condensed Consolidated Balance Sheets.

We have historically sponsored the Asbury Automotive Wealth Accumulation Plan (the “Deferred Compensation Plan” or the “Plan”) wherein eligible employees, generally those at senior levels, may elect to defer a portion of their annual compensation. In February 2012, our Board of Directors elected to terminate the Plan. During the three months ended March 31, 2013, we (i) received a \$7.8 million lump sum distribution as a result of the termination of the Plan and (ii) used these proceeds to relieve our corresponding \$7.8 million total liability to the Plan's participants.

9. COMMITMENTS AND CONTINGENCIES

Our dealerships are party to dealer and framework agreements with applicable vehicle manufacturers. In accordance with these agreements, each dealership has certain rights and is subject to restrictions typical in the industry. The ability of these manufacturers to influence the operations of the dealerships or the loss of any of these agreements could have a materially negative impact on our operating results.

In some instances, manufacturers may have the right, and may direct us, to implement costly capital improvements to dealerships as a condition to entering into, renewing or extending franchise agreements with them. Manufacturers also typically require that their franchises meet specific standards of appearance. These factors, either alone or in combination, could cause us to use our financial resources on capital projects that we might not have planned for or otherwise determined to undertake.

From time to time, we and our dealerships are or may become involved in various claims relating to, and arising out of, our business and our operations. These claims may involve, but not be limited to, financial and other audits by vehicle manufacturers, lenders and certain federal, state and local government authorities, which have historically related primarily to (a) incentive and warranty payments received from vehicle manufacturers, or allegations of violations of manufacturer agreements or policies, (b) compliance with lender rules and covenants and (c) payments made to government authorities relating to federal, state and local taxes, as well as compliance with other government regulations. Claims may also arise through litigation, government proceedings and other dispute resolution processes. Such claims, including class actions, could relate to, but may not be limited to, claims related to the practice of charging administrative fees and other fees and commissions, employment-related matters, truth-in-lending and other dealer assisted financing obligations, contractual disputes, actions brought by governmental authorities and other matters. We evaluate pending and threatened claims and establish loss contingency reserves based upon outcomes we currently believe to be probable and reasonably estimable.

The Company has recently resolved a dispute with an affiliate of a vehicle manufacturer whose brands we sell relating to the alleged receipt by the Company of certain overpayments from vehicle service work. In April 2013, the Company settled this exposure for an amount approximating its previously established accrual for probable loss related to this matter. The settlement was not material to the Company's financial statements.

It is reasonably possible that losses in excess of the amounts accrued for the various types of claims currently known to us could be up to approximately \$0.5 million in the aggregate. We currently do not anticipate that any known claim will materially adversely affect our financial condition, liquidity or results of operations. However, the outcome of any matter cannot be predicted with certainty, and an unfavorable resolution of one or more matters presently known or arising in the future could have a material adverse effect on our financial condition, liquidity or results of operations.

A significant portion of our business involves the sale of vehicles, parts or vehicles composed of parts that are manufactured outside the United States. As a result, our operations are subject to customary risks of importing merchandise, including fluctuations in the relative values of currencies, import duties, exchange controls, trade restrictions, work stoppages and general political and socio-economic conditions in foreign countries. The United States or the countries from which our products are imported may, from time to time, impose new quotas, duties, tariffs or other restrictions, or adjust presently prevailing quotas, duties or tariffs, which may affect our operations and our ability to purchase imported vehicles and/or parts at reasonable prices.

Substantially all of our facilities are subject to federal, state and local provisions regarding the discharge of materials into the environment. Compliance with these provisions has not had, nor do we expect such compliance to have, any material effect upon our capital expenditures, net earnings, financial condition, liquidity or competitive position. We believe that our current practices and procedures for the control and disposition of such materials comply with applicable federal, state and local requirements. No assurances can be provided, however, that future laws or regulations, or changes in existing laws or regulations, would not require us to expend significant resources in order to comply therewith.

We had \$14.6 million of letters of credit outstanding as of March 31, 2013, which are required by certain of our insurance providers. In addition, as of March 31, 2013, we maintained a \$5.0 million surety bond line in the ordinary course of our business. Our letters of credit and surety bond line are considered to be off balance sheet arrangements.

Our other material commitments include (i) floor plan notes payable, (ii) operating leases, (iii) long-term debt and (iv) interest on long-term debt, as described elsewhere herein.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operation

Forward-Looking Information

Certain of the discussions and information included in this report may constitute "forward-looking statements" within the meaning of the federal securities laws. Forward-looking statements are statements that are not historical in nature and may include statements relating to our goals, plans and projections regarding industry and general economic trends, our expected financial position, results of operations or market position and our business strategy. Such statements can generally be identified by words such as "may," "target," "could," "would," "will," "should," "believe," "expect," "anticipate," "plan," "intend," "foresee" and other similar words or phrases. Forward-looking statements may also relate to our expectations and assumptions with respect to, among other things:

- our ability to execute our business strategy;
- our ability to further improve our operating cash flows, and the availability of capital and liquidity;
- our estimated future capital expenditures;
- the duration of the economic recovery process and its impact on our revenues and expenses;
- our parts and service revenue due to, among other things, improvements in manufacturing quality, manufacturer recalls, the recently lower than historical seasonally adjusted annual rate ("SAAR") of new vehicle sales in the U.S. and any changes in business strategy and government regulations;
- the variable nature of significant components of our cost structure;
- our ability to decrease our exposure to regional economic downturns due to our geographic diversity and brand mix;
- manufacturers' willingness to continue to use incentive programs to drive demand for their product offerings;
- our ability to leverage our common systems, infrastructure and processes in a cost-efficient manner;
- our acquisition and divestiture strategies;
- the continued availability of financing, including floor plan financing for inventory;
- the ability of consumers to secure vehicle financing;
- the growth of mid-line import and luxury brands over the long-term;
- our ability to mitigate any future negative trends in new vehicle sales; and
- our ability to increase our net income as a result of the foregoing and other factors.

Forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause our actual future results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. Such factors include, but are not limited to:

- our ability to execute our balanced automotive retailing and service business strategy;
- changes in the mix, and total number, of vehicles we are able to sell;
- changes in general economic and business conditions, including changes in consumer confidence levels, interest rates, consumer credit availability and employment levels;
- changes in laws and regulations governing the operation of automobile franchises, including trade restrictions, consumer protections, accounting standards, taxation requirements and environmental laws;
- changes in the price of oil and gasoline;
- our ability to generate sufficient cash flows, maintain our liquidity and obtain additional funds for working capital, capital expenditures, acquisitions, debt maturities and other corporate purposes, if necessary;
- our continued ability to comply with applicable covenants in various of our financing and lease agreements, or to obtain waivers of these covenants as necessary;
- our relationships with, and the reputation and financial health and viability of, the vehicle manufacturers whose brands we sell, and their ability to design, manufacture, deliver and market their vehicles successfully;

- significant disruptions in the production and delivery of vehicles and parts for any reason, including natural disasters, product recalls, work stoppages or other occurrences that are outside of our control;
- adverse results from litigation or other similar proceedings involving us;
- our relationships with, and the financial stability of, our lenders and lessors;
- our ability to execute our initiatives and other strategies;
- high levels of competition in our industry, which may create pricing and margin pressures on our products and services;
- our ability to renew, and enter into new, framework and dealer agreements with vehicle manufacturers whose brands we sell, on terms acceptable to us;
- our ability to attract and to retain key personnel;
- our ability to leverage gains from our dealership portfolio; and
- significant disruptions in the financial markets, which may impact our ability to access capital.

Many of these factors are beyond our ability to control or predict, and their ultimate impact could be material. Moreover, the factors set forth in the discussion and analysis below and under Item 1A entitled “Risk Factors” in our Annual Report on Form 10-K for the year ended December 31, 2012 and other cautionary statements made in this report should be read and considered as forward-looking statements subject to such uncertainties. Forward-looking statements speak only as of the date they are made, and we assume no obligation to update any forward-looking statements.

OVERVIEW

We are one of the largest automotive retailers in the United States, operating 97 franchises (76 dealership locations) in 18 metropolitan markets within 10 states as of March 31, 2013. We offer an extensive range of automotive products and services, including new and used vehicles; vehicle maintenance, replacement parts and collision repair services; and financing, insurance and service contracts. As of March 31, 2013, we offered 29 domestic and foreign brands of new vehicles. Our current brand mix is weighted 85% towards luxury and mid-line import brands, with the remaining 15% consisting of domestic brands. We also operate 25 collision repair centers that serve customers in our local markets.

Our retail network is made up of dealerships operating primarily under the following locally-branded dealership groups:

- Coggin dealerships, operating primarily in Jacksonville, Fort Pierce and Orlando, Florida;
- Courtesy dealerships operating in Tampa, Florida;
- Crown dealerships operating in New Jersey, North Carolina, South Carolina and Virginia;
- Nalley dealerships operating in Atlanta, Georgia;
- McDavid dealerships operating in Austin, Dallas and Houston, Texas;
- North Point dealerships operating in Little Rock, Arkansas;
- Plaza dealerships operating in St. Louis, Missouri; and
- Gray-Daniels dealerships operating in Jackson, Mississippi.

Our revenues are derived primarily from: (i) the sale of new vehicles to individual retail customers (“new vehicle retail”) and commercial customers (“fleet”) (the terms “new vehicle retail” and “fleet” being together referred to as “new”); (ii) the sale of used vehicles to individual retail customers (“used retail”) and to other dealers at auction (“wholesale”) (the terms “used retail” and “wholesale” being together referred to as “used”); (iii) maintenance and collision repair services and the sale of automotive parts (together referred to as “parts and service”); and (iv) the arrangement of vehicle financing and the sale of a number of aftermarket products, such as insurance and service contracts (collectively referred to as “F&I”). We evaluate the results of our new and used vehicle sales based on unit volumes and gross profit per vehicle sold, our parts and service operations based on aggregate gross profit, and F&I based on dealership generated F&I gross profit per vehicle sold. We assess the organic growth of our revenue and gross profit by comparing the year-to-year results of stores that we have operated for at least twelve full months (“same store”).

Our organic growth is dependent upon the execution of our balanced automotive retailing and service business strategy, the continued strength of our brand mix and the production of desirable vehicles by automobile manufacturers whose brands we sell. Our vehicle sales have historically fluctuated with product availability as well as local and national economic conditions, including consumer confidence, availability of consumer credit, fuel prices and employment levels. We believe that the impact on our business of any future negative trends in new vehicle sales would be partially mitigated by (i) the expected relative stability of our parts and service operations over the long-term, (ii) the variable nature of significant components of our cost structure and (iii) our brand mix. Historically, our brand mix has been less affected by market volatility than the U.S. automobile industry as a whole. We believe that our new vehicle revenue brand mix, which included approximately 49% of revenue from mid-line import brands and 36% of revenue from luxury brands in the first quarter of 2013, is well positioned for growth over the long term.

Our operating results are generally subject to changes in the economic environment as well as seasonal variations. Historically, we have generated more revenue and operating income in the second and third quarters than in the first and fourth quarters of the calendar year. Generally, the seasonal variations in our operations are caused by factors related to weather conditions, changes in manufacturer incentive programs, model changeovers and consumer buying patterns, among other things.

Our gross profit margin varies with our revenue mix. The sale of new vehicles generally results in lower gross profit margin than used vehicle sales and sales of parts and service. As a result, when used vehicle and parts and service revenue increase as a percentage of total revenue, we expect our overall gross profit margin to increase.

Selling, general and administrative ("SG&A") expenses consist primarily of fixed and incentive-based compensation, advertising, rent, insurance, utilities and other customary operating expenses. A significant portion of our cost structure is variable (such as sales commissions), or controllable (such as advertising), generally allowing us to adapt to changes in the retail environment over the long-term. We evaluate commissions paid to salespeople as a percentage of retail vehicle gross profit and all other SG&A expenses in the aggregate as a percentage of total gross profit, with the exception of advertising expense, which we evaluate on a per vehicle retailed ("PVR") basis.

The United States automotive retail market showed continued improvement through the first quarter of 2013, with new vehicle SAAR increasing to 15.3 million during the first three months of 2013 as compared to 14.2 million during the first three months of 2012. We continued to benefit from improving economic conditions in the first quarter of 2013, which we attribute to improved consumer confidence, the availability of credit at terms favorable to consumers resulting primarily from the current low interest rate environment, gradually improving unemployment and the increasing age of the U.S. automotive fleet. We believe that the overall economic recovery will continue to be fragile, and may be subject to further changes based on consumer confidence, unemployment levels and other macro-economic factors as the long-term prospects for, and the timing of, a return to a stronger economy continue to be difficult to predict.

We had total available liquidity of \$311.7 million as of March 31, 2013, which consisted of cash and cash equivalents of \$0.1 million, borrowing availability of \$224.9 million under our revolving credit facilities and \$86.7 million of availability under our floor plan offset account. For further discussion of our liquidity, please refer to "Liquidity and Capital Resources" below. We have no long-term debt maturities until October 2015, at which time two of our mortgage notes payable associated with certain of our properties in St. Louis, Missouri, will mature. As of March 31, 2013, the aggregate principal amount outstanding under these two mortgage notes payable was \$19.4 million.

RESULTS OF OPERATIONS

Three Months Ended March 31, 2013 Compared to the Three Months Ended March 31, 2012

Total gross profit	100.0%	100.0%
SG&A EXPENSES AS A PERCENTAGE OF GROSS PROFIT	71.6%	74.5%

Net income and income from continuing operations increased by \$14.9 million (85%) and \$6.7 million (39%), respectively, in the first quarter of 2013 as compared to the first quarter of 2012. The increase in income from continuing operations was primarily the result of a \$22.2 million (12%) increase in gross profit, which was partially offset by (i) a \$10.7 million (8%) increase in SG&A expenses and (ii) a \$4.3 million (39%) increase in income tax expense. Net income for the first quarter of 2013 was positively impacted by the sale of one franchise (one dealership location), which resulted in an \$8.9 million net-of-tax gain, which is included in discontinued operations, net.

Gross profit increased across all four of our business lines and was driven by (i) a \$9.3 million (25%) increase in F&I gross profit, (ii) a \$7.4 million (9%) increase in parts and service gross profit and (iii) a \$3.3 million (12%) increase in used vehicle gross profit. Our total gross profit margin decreased 30 basis points to 16.9%, primarily as a result of (i) a 60 basis point decrease in our same store new vehicle retail gross margin and (ii) a 50 basis point decrease in our same store used vehicle retail gross margin, which was partially offset by a 230 basis point increase in our same store parts and service gross margin. In reviewing the contributions of our business lines to our overall gross profit, we also experienced a 110 basis point decrease in our higher-margin parts and service business as a percentage of our overall gross profit.

The \$155.4 million (15%) increase in total revenue was primarily a result of (i) an \$89.6 million (16%) increase in new vehicle revenue, (ii) a \$49.6 million (16%) increase in used vehicle revenue and (iii) a \$9.3 million (25%) increase in revenue from F&I.

New Vehicle Metrics—

	For the Three Months Ended March 31,		Increase (Decrease)	% Change
	2013	2012		
Revenue per new vehicle sold—same store(1)	\$ 33,076	\$ 31,974	\$ 1,102	3 %
Gross profit per new vehicle sold—same store(1)	\$ 2,028	\$ 2,141	\$ (113)	(5)%
New vehicle gross margin—same store(1)	6.1%	6.7%	(0.6)%	(9)%

(1) Same store amounts consist of information from dealerships for the identical months of each period presented in the comparison, commencing with the first full month in which the dealership was owned by us.

The \$89.6 million (16%) increase in new vehicle revenue was primarily a result of a \$38.2 million (19%) increase in revenue from our luxury brands and a \$33.1 million (11%) increase in revenue from our mid-line import brands, which drove an \$80.6 million (14%) increase in overall same store new vehicle revenue. Our total new vehicle revenue also benefited from \$9.0 million derived from acquisitions. Same store unit volumes for our luxury and mid-line import brands increased 19% and 10%, respectively, reflecting (i) a general increase in consumer demand, (ii) the continued availability of credit at terms

favorable to our customers and (iii) an improvement in the availability of new vehicle inventory from which to choose. Unit volumes from our domestic brands also increased 11% on a same store basis. New vehicle SAAR increased to 15.3 million for the first quarter of 2013 as compared to 14.2 million for the first quarter of 2012.

Total new vehicle gross profit increased by \$2.2 million (6%), primarily driven by a \$1.6 million (10%) increase in gross profit from our luxury brands. Our mid-line import brands, which experienced a 10% increase in unit volume, also experienced a 70 basis point decrease in gross profit margin when compared to the prior year period primarily as a result of higher inventory levels and increased competition among mid-line import brands. Our same store gross profit per new vehicle sold decreased by \$113 (5%), largely driven by a reduction in gross profit associated with our mid-line import vehicle sales. Our margins in the near future are expected to be primarily dependent upon market-based forces of supply and demand.

Used Vehicle—

Used Vehicle Metrics—

	For the Three Months Ended March 31,		Increase (Decrease)	% Change
	2013	2012		
Revenue per used vehicle retailed—same store(1)	\$ 19,393	\$ 18,487	\$ 906	5 %
Gross profit per used vehicle retailed—same store(1)	\$ 1,847	\$ 1,852	\$ (5)	— %
Used vehicle retail gross margin—same store(1)	9.5%	10.0%	(0.5)%	(5)%

(1) Same store amounts consist of information from dealerships for the identical months of each period presented in the comparison, commencing with the first full month in which the dealership was owned by us.

The \$49.6 million (16%) increase in used vehicle revenue was the result of a \$45.0 million (16%) increase in used vehicle retail revenue and a \$4.6 million (11%) increase in used vehicle wholesale revenue, which include \$5.6 million and \$0.5

million, respectively, derived from acquisitions. The 9% increase in same store used vehicle retail unit sales reflects the ongoing impact of our "Asbury 1-2-1" program, a volume-driven initiative with a goal of retailing one used vehicle for every new vehicle retailed. This program is designed to drive not only used retail volume, but to increase revenues from associated parts and service reconditioning and F&I as well.

The \$3.1 million (11%) increase in used vehicle retail gross profit was driven primarily by higher unit volumes, partially offset by a 50 basis point decrease in our same store used vehicle retail gross margin. The decrease in our same store used vehicle gross margin can be partially attributed to the increased availability of competitively priced new models that, until mid-2012, were in short supply as a result of the 2011 natural disaster and related events in Japan.

We believe that our used vehicle inventory continues to be well-aligned with current consumer demand, with approximately 32 days of supply in our inventory as of March 31, 2013.

Parts and Service—

	For the Three Months Ended March			
	31,			%
	2013	2012	Increase	Change
	(Dollars in millions)			
Revenue:				
Parts and service revenue—same store(1)	\$ 145.6	\$ 140.7	\$ 4.9	3%
Parts and service revenues—acquisitions	2.0	—		
Parts and service revenue, as reported	<u>\$ 147.6</u>	<u>\$ 140.7</u>	\$ 6.9	5%
Gross profit:				
Parts and service gross profit—same store(1)				
Customer pay	\$ 51.6	\$ 49.5	\$ 2.1	4%
Reconditioning and preparation	19.1	16.0	3.1	19%
Warranty	11.0	10.0	1.0	10%
Wholesale parts	4.9	4.8	0.1	2%
Total parts and service gross profit—same store(1)	<u>86.6</u>	<u>80.3</u>	6.3	8%
Parts and service gross profit—acquisitions	1.1	—		
Parts and service gross profit, as reported	<u>\$ 87.7</u>	<u>\$ 80.3</u>	\$ 7.4	9%
Parts and service gross margin—same store(1)	59.4%	57.1%	2.3%	4%

(1) Same store amounts consist of information from dealerships for the identical months of each period presented in the comparison, commencing with the first full month in which the dealership was owned by us.

The \$6.9 million (5%) increase in parts and service revenue was primarily due to (i) a \$3.3 million (3%) increase in same store customer pay revenue, (ii) a \$1.0 million (5%) increase in same store warranty revenue and (iii) \$2.0 million derived from acquisitions. The 230 basis point increase in our same store parts and service gross margin was primarily the result of increases in our higher margin parts and service businesses, including a 19% increase in gross profit from reconditioning and preparation of vehicles and a 4% increase in our customer pay parts and service gross profit. The \$3.1 million increase in reconditioning and preparation gross profit was primarily driven by a 12% increase in our same store new vehicle retail unit sales and a 9% increase in our same store used vehicle retail unit sales. Gross profit associated with warranty work increased by \$1.0 million (10%), partially due to certain manufacturer recalls that occurred during the first quarter of 2013 that drove increased warranty work, as well as increased units in operation as sales of new vehicles in the United States have continued to increase over the past few years.

We continue to focus on increasing our parts and service revenue, and specifically our customer pay business, over the long-term by (i) continuing to invest in additional service capacity, where appropriate, (ii) upgrading equipment, (iii) focusing on improving customer retention and customer satisfaction and (iv) capitalizing on our dealer training programs.

Finance and Insurance, net—

	For the Three Months Ended March			
	31,			%
	2013	2012	Increase	Change
	(Dollars in millions, except for per vehicle data)			
Finance and insurance, net—same store(1)	\$ 46.5	\$ 37.7	\$ 8.8	23%
Finance and insurance, net—acquisitions	0.5	—		
Finance and insurance, net as reported	\$ 47.0	\$ 37.7	\$ 9.3	25%
Finance and insurance, net per vehicle sold—same store(1)	\$ 1,293	\$ 1,150	\$ 143	12%

(1) Same store amounts consist of information from dealerships for the identical months of each period presented in the comparison, commencing with the first full month in which the dealership was owned by us.

F&I increased by \$9.3 million (25%) during the first quarter of 2013 as compared to the first quarter of 2012, primarily due to (i) an 11% increase in retail unit sales and (ii) a 12% increase in F&I per vehicle sold. The \$143 increase in F&I per vehicle sold was primarily attributable to improvement in the number of F&I contracts sold as a percentage of retail unit sales (also known as our F&I penetration rate), which was driven by (i) the improved availability of consumer credit, which allowed more of our customers to take advantage of a broader array of F&I products, (ii) the addition of key personnel to our F&I management team and (iii) our continued focus on improving the F&I results at our lower-performing stores through our F&I training programs, which include implementing a certification process and certain best practices initiatives.

Selling, General and Administrative Expense—

	For the Three Months Ended March 31,				Increase (Decrease)	% of Gross Profit (Decrease) Increase
	2013	% of Gross Profit	2012	% of Gross Profit		
	(Dollars in millions)

Acquisitions	1.8		—			
Selling, general and administrative—actual	\$ 148.1	71.6%	\$ 137.4	74.5%	\$ 10.7	(2.9)%
Gross profit—same store(1)	\$ 203.9		\$ 184.5			
Gross profit—actual	\$ 206.7		\$ 184.5			

(1) Same store amounts consist of information from dealerships for the identical months of each period presented in the comparison, commencing with the first full month in which the dealership was owned by us.

Same store SG&A expense as a percentage of gross profit was 71.8% for the first quarter of 2013 as compared to 74.5% for the first quarter of 2012. The 270 basis point decrease was primarily attributable to (i) a 160 basis point decrease in personnel costs as a result of further leveraging our fixed cost structure, (ii) a 90 basis point decrease in outside service costs as a result of lower legal fees and training costs in the 2013 period when compared to the 2012 period and (iii) a 50 basis point decrease in rent expense primarily as a result of our purchase of certain previously leased real estate during 2012.

We continue to be engaged in numerous productivity initiatives designed to further reduce our fixed cost structure and improve our profitability and are currently focused on fully leveraging our single dealer management system with our other technology platforms and various back office processes.

Floor Plan Interest Expense —

The \$0.4 million (15%) increase in floor plan interest expense was primarily the result of higher levels of new vehicle inventory during the first quarter of 2013 when compared to the first quarter of 2012, which was the result of depressed new vehicle inventory levels in the first half of 2012 due primarily to the natural disaster and related events in Japan in 2011.

Swap Interest Expense —

We have historically entered into various derivative financial instruments, including fair value and cash flow interest rate swaps, which have been designed to provide hedges against changes in fair value of certain debt obligations and variable rate cash flows. Our earnings have been impacted by these interest rate swaps in the form of (i) amounts reclassified from AOCI to

earnings for active swaps, (ii) amortization of amounts reclassified from AOCI to earnings for terminated cash flow swaps and (iii) amortization of terminated fair value swaps. The pre-tax impact on earnings related to our various derivative financial instruments for the first quarters of 2013 and 2012 was \$1.2 million and \$1.3 million, respectively.

Income Tax Expense—

The \$4.3 million (39%) increase in income tax expense was primarily a result of the \$11.0 million (39%) increase in income before income taxes in the first quarter of 2013 as compared to the first quarter of 2012. Our effective tax rate increased from 38.8% for the 2012 period to 38.9% in the 2013 period. Our effective tax rate is highly dependent on our level of income before income taxes and permanent differences between book and tax income. As a result, it is difficult to project our overall effective tax rate for any given period. Based upon our current expectation of 2013 income before income taxes, we expect our effective income tax rate will be between 38% and 40% in 2013.

Discontinued Operations—

During the first quarter of 2013, we sold one franchise (one dealership location) that was classified as discontinued operations. The \$8.6 million, net of tax, net gain from discontinued operations in the first quarter of 2013 includes an \$8.9 million, net of tax, gain on the sale of one franchise (one dealership location), which was partially offset by \$0.3 million, net of tax, of net operating losses of franchises sold prior to March 31, 2013, including rent and other expenses of idle facilities.

The \$0.4 million, net of tax, net gain from discontinued operations for the first quarter of 2012 consists of net operating gains of franchises and ancillary businesses sold prior to March 31, 2013, partially offset by rent and other expenses of idle facilities.

We continuously evaluate the financial and operating results of our dealerships, as well as each dealership's geographical location, and may continue to refine our dealership portfolio through strategic acquisitions or divestitures from time to time.

LIQUIDITY AND CAPITAL RESOURCES

As of March 31, 2013, we had total available liquidity of \$311.7 million, which consisted of cash and cash equivalents of \$0.1 million, borrowing availability of \$224.9 million under our revolving credit facilities and \$86.7 million of availability under our floor plan offset account, described below, which is generally accessible within one to two days. The total borrowing capacity under our revolving credit facilities is limited by borrowing base calculations and, from time to time, may be further limited by our required compliance with certain financial covenants. As of March 31, 2013, these financial covenants did not further limit our availability under our credit facilities. For more information on our financial covenants, see "Covenants" below.

We continually evaluate our liquidity and capital resources based upon (i) our cash and cash equivalents on hand, (ii) the funds that we expect to generate through future operations, (iii) current and expected borrowing availability under our revolving credit facilities, our floor plan facilities and our mortgage financing, (iv) amounts in our new vehicle floor plan notes payable offset account and (v) the potential impact of any contemplated or pending future transactions, including, but not limited to, financings, acquisitions, dispositions or other capital expenditures. We believe we will have sufficient liquidity to meet our debt service and working capital requirements; commitments and contingencies; debt repayment, maturity and repurchase obligations; acquisitions; capital expenditures; and any operating requirements for at least the next twelve months.

We currently have the following material credit facilities, floor plan facilities, mortgage notes, and senior subordinated notes. For a more detailed description of the material terms of our senior secured credit facilities, mortgage notes and senior subordinated notes, refer to the "Floor Plan Notes Payable" and "Long-Term Debt" footnotes included in our Annual Report on Form 10-K for the fiscal year ended December 31, 2012.

- **Revolving credit facility** - a \$175.0 million senior secured revolving credit facility for, among other things, acquisitions, working capital and capital expenditures, including a \$50.0 million sublimit for letters of credit. Our borrowing capacity under the revolving credit facility is limited by a borrowing base calculation and any outstanding letters of credit. As of March 31, 2013, we had \$14.6 million in outstanding letters of credit, resulting in \$160.4 million of borrowing availability under our revolving credit facility. There were no amounts drawn under our revolving credit facility as of March 31, 2013.
- **New inventory floor plan facilities** - a \$625.0 million senior secured new vehicle revolving floor plan facility. In conjunction with the new vehicle floor plan facility, we established an account with Bank of America that allows us to transfer cash to an account as an offset to floor plan notes payable (a "floor plan offset account"). These transfers reduce the amount of outstanding new vehicle floor plan notes payable that would otherwise accrue interest, while

retaining the ability to transfer amounts from the offset account into our operating cash accounts within one to two days. As a result of the use of our floor plan offset account, we experience a reduction in Floor plan interest expense on our Condensed Consolidated Statements of Income. As of March 31, 2013, we had \$86.7 million in this floor plan offset account. We also have a floor plan facility with Ford to purchase new Ford and Lincoln vehicle inventory, as well as facilities with certain other manufacturers for loaner vehicles. Neither our floor plan facility with Ford nor our facilities for loaner vehicles have stated borrowing limitations. As of March 31, 2013, we had \$463.4 million, net outstanding under our senior secured new vehicle revolving floor plan facility and \$60.6 million outstanding under our floor plan facility with Ford.

- **Used vehicle floor plan facility** - a \$100.0 million senior secured used vehicle revolving floor plan facility to finance the acquisition of used vehicle inventory and for, among other things, other working capital and capital expenditures, as well as to refinance used vehicles. Our borrowing capacity under the used vehicle floor plan facility is limited by a borrowing base calculation. As of March 31, 2013, we had \$2.0 million outstanding under our used vehicle revolving floor plan facility, which was drawn for general corporate purposes, and \$64.5 million of remaining borrowing availability under our used vehicle revolving floor plan facility.
- **Mortgage notes** - as of March 31, 2013, we had \$130.3 million of mortgage note obligations. These obligations are secured by the related underlying property.
- **7.625% Senior Subordinated Notes due 2017 (“7.625% Notes”)** - as of March 31, 2013, we had \$143.2 million in aggregate principal amount of our 7.625% Notes outstanding. We are required to pay interest on the 7.625% Notes on March 15 and September 15 of each year until their maturity on March 15, 2017.
- **8.375% Senior Subordinated Notes due 2020 (“8.375% Notes”)** - as of March 31, 2013, we had \$200.0 million in aggregate principal amount of our 8.375% Notes outstanding. We are required to pay interest on the 8.375% Notes on May 15 and November 15 of each year until their maturity on November 15, 2020.

Under the terms of the senior secured credit facilities and certain mortgage notes payable, our ability to incur new indebtedness is currently limited to (i) permitted floor plan indebtedness, (ii) certain refinancings, refunds, renewals or extensions of existing indebtedness, and (iv) other customary permitted indebtedness.

Mortgage Financing

During the three months ended March 31, 2013, we entered into one fixed rate mortgage note payable which is collateralized by the related real estate at one of our owned dealership locations. The initial principal amount of the mortgage note payable was \$12.5 million. In connection with our entrance into this mortgage note payable, we paid approximately \$0.1 million in debt issuance costs, which were capitalized and are being amortized to Other Interest Expense over the terms of the related mortgage note payable.

Covenants

We are subject to a number of covenants in our various debt and lease agreements. We are currently in compliance with all of our covenants.

Subordinated Note Repurchases

Our board of directors has authorized us, from time to time, to repurchase various of our senior subordinated notes in open market purchases or privately negotiated transactions. The decision to repurchase our senior subordinated notes is dependent upon prevailing market conditions, our liquidity position, applicable limitations in any agreements to which we are a party, and other factors. Currently, the credit agreement governing our senior secured credit facilities allows us to purchase at least \$25.0 million of our debt securities per calendar year, subject to increase based on availability under our senior secured credit facilities.

Share Repurchases

In December 2012, our Board of Directors authorized the repurchase of up to \$50.0 million of the Company's common stock in open market transactions, effective January 1, 2013. During the first quarter of 2013, we repurchased a total of 213,303 shares of our common stock under our authorized repurchase program for a total of \$7.4 million. As of March 31, 2013, we had remaining authorization to repurchase \$42.6 million in shares of our common stock.

During the first quarter of 2013, we also repurchased 114,561 shares of our common stock for \$4.2 million from employees in connection with a net share settlement feature of employee equity-based awards.

Deferred Compensation Plan

We have historically sponsored the Asbury Automotive Wealth Accumulation Plan (the “Deferred Compensation Plan” or the “Plan”) wherein eligible employees, generally those at senior levels, may elect to defer a portion of their annual compensation. In February 2012, our Board of Directors elected to terminate the Plan. During the three months ended March 31, 2013, we (i) received a \$7.8 million lump sum distribution as a result of the termination of the Plan and (ii) used these proceeds to relieve our corresponding \$7.8 million total liability to the Plan's participants.

Cash Flows

Classification of Cash Flows Associated with Floor Plan Notes Payable

Borrowings and repayments of floor plan notes payable to a lender unaffiliated with the manufacturer from which we purchase a particular new vehicle (“Non-Trade”), and all floor plan notes payable relating to pre-owned vehicles (together referred to as “Floor Plan Notes Payable - Non-Trade”), are classified as financing activities on the accompanying Condensed Consolidated Statements of Cash Flows, with borrowings reflected separately from repayments. The net change in floor plan notes payable to a lender affiliated with the manufacturer from which we purchase a particular new vehicle (collectively referred to as “Floor Plan Notes Payable - Trade”) is classified as an operating activity on the accompanying Condensed Consolidated Statements of Cash Flows. Borrowings of floor plan notes payable associated with inventory acquired in connection with all acquisitions are classified as a financing activity in the accompanying Condensed Consolidated Statement of Cash Flows. Cash flows related to floor plan notes payable included in operating activities differ from cash flows related to floor plan notes payable included in financing activities only to the extent that the former are payable to a lender affiliated with the manufacturer from which we purchased the related inventory, while the latter are payable to a lender not affiliated with the manufacturer from which we purchased the related inventory. Repayments of Floor Plan Notes Payable - Trade associated with divestitures are classified as an operating activity. Repayments of Floor Plan Notes Payable - Non-Trade associated with divestitures are classified as a financing activity.

Floor plan borrowings are required by all vehicle manufacturers for the purchase of new vehicles, and all floor plan lenders require amounts borrowed for the purchase of a vehicle to be repaid within a short time period after the related vehicle is sold. As a result, we believe that it is important to understand the relationship between the cash flows of all of our floor plan notes payable and new vehicle inventory in order to understand our working capital and operating cash flow and to be able to compare our operating cash flow to that of our competitors (i.e., if our competitors have a different mix of trade and non-trade floor plan financing as compared to us). In addition, we include all floor plan borrowings and repayments in our internal operating cash flow forecasts. As a result, we use the non-GAAP measure “cash provided by (used in) operating activities, as adjusted” (defined below) to compare our results to forecasts. We believe that splitting the cash flows of floor plan notes payable between operating activities and financing activities, while all new vehicle inventory activity is included in operating activities, results in significantly different operating cash flow than if all the cash flows of floor plan notes payable were classified together in operating activities.

Cash provided by operating activities, as adjusted, includes borrowings and repayments of floor plan notes payable to lenders not affiliated with the manufacturer from which we purchase the related vehicle. Cash provided by operating activities, as adjusted, has material limitations, and therefore, may not be comparable to similarly titled measures of other companies and should not be considered in isolation, or as a substitute for analysis of our operating results in accordance with GAAP. In order to compensate for these potential limitations we also review the related GAAP measures.

We have provided below a reconciliation of cash flow from operating activities, as if all changes in floor plan notes payable, except for (i) borrowings associated with acquisitions and repayments associated with divestitures and (ii) borrowings and repayments associated with the purchase of used vehicle inventory, were classified as an operating activity.

	For the Three Months Ended March 31,	
	2013	2012
	(In millions)	
<i>Reconciliation of Cash provided by (used in) operating activities to Cash (used in) provided by operating activities, as adjusted</i>		
Cash provided by (used in) operating activities, as reported	\$ 8.4	\$ (36.1)
New vehicle floor plan (repayments) borrowings - non-trade, net	(38.2)	68.3
Cash (used in) provided by operating activities, as adjusted	\$ (29.8)	\$ 32.2

Operating Activities—

Net cash provided by operating activities totaled \$8.4 million for the three months ended March 31, 2013. Net cash used in operating activities totaled \$36.1 million for the three months ended March 31, 2012. Net cash used in operating activities, as adjusted, totaled \$29.8 million for the three months ended March 31, 2013. Net cash provided by operating activities, as adjusted, totaled \$32.2 million for the three months ended March 31, 2012. Net cash (used in) provided by operating activities, as adjusted, includes net income, adjustments to reconcile net income to net cash used in operating activities and changes in working capital, including changes in floor plan notes payable and inventory.

The \$62.0 million decrease in our net cash provided by operating activities, as adjusted, for the three months ended March 31, 2013 compared to the three months ended March 31, 2012 was primarily the result of the following:

- \$72.9 million related to an increase in inventory, net of floor plan notes payable, primarily as a result of a \$74.1 million increase in our floor plan offset account during the first three months of 2013 when compared to the first three months of 2012;
- \$8.3 million related to a decrease in accounts payable and accrued expenses during the first three months of 2013 when compared to the first three months of 2012; and
- \$3.2 million refund of excess funding received during the three months ended March 31, 2012 related to our Deferred Compensation Plan.

The decrease in our cash provided by operating activities, as adjusted, was partially offset by:

- \$22.6 million related to sales volume and the associated timing of collection of accounts receivable and contracts-in-transit during the first three months of 2013 as compared to the first three months of 2012.

Investing Activities—

Net cash provided by investing activities totaled \$27.4 million for the three months ended March 31, 2013. Net cash used in investing activities totaled \$14.0 million for the three months ended March 31, 2012. Cash flows from investing activities relate primarily to capital expenditures, acquisition and divestiture activity and sales of property and equipment.

Capital expenditures, excluding the purchase of real estate and lease buyouts, were \$6.5 million and \$8.0 million for the three months ended March 31, 2013 and 2012, respectively. Real estate related capital expenditures totaled \$6.0 million for the three months ended March 31, 2012.

Our capital investments currently consist primarily of real estate purchases, upgrades to our existing facilities and equipment purchases. We expect that capital expenditures during 2013 will total approximately \$45.0 million, excluding the purchase of real estate. As part of our capital allocation strategy, we continuously evaluate opportunities to purchase properties currently under lease. No assurances can be provided that we will have or be able to access capital at times or on terms in amounts deemed necessary to execute this strategy.

Proceeds from the sale of assets totaled \$33.9 million for the three months ended March 31, 2013. Included in proceeds from the sale of assets for the three months ended March 31, 2013 was \$7.5 million associated with the sale of inventory in connection with the sale of one franchise (one dealership location). We continuously monitor the profitability and market value of our dealerships and may, under certain conditions, strategically divest certain dealerships.

Financing Activities—

Net cash used in financing activities totaled \$41.9 million for the three months ended March 31, 2013. Net cash provided by financing activities totaled \$43.0 million for the three months ended March 31, 2012.

During the three months ended March 31, 2013 and 2012, we had non-trade floor plan borrowings of \$730.5 million and \$696.5 million, respectively. The majority of our floor plan notes are payable to parties unaffiliated with the entities from which we purchase our new vehicle inventory, with the exception of floor plan notes payable relating to the financing of new Ford and Lincoln vehicles.

During the three months ended March 31, 2013 and 2012, we made non-trade floor plan repayments of \$768.7 million and \$628.2 million, respectively. Included in the \$768.7 million of non-trade floor plan repayments was a \$74.1 million increase in our floor plan offset account. In addition, during the three months ended 2013 we made non-trade floor plan repayments of \$5.4 million related to the divestitures of one franchise (one dealership location).

During the three months ended March 31, 2013 we entered into one fixed rate mortgage note payable which was collateralized by the related real estate of that dealership location. The initial principal amount of the mortgage note payable was \$12.5 million. We paid \$0.1 million in debt issuance costs associated with this mortgage.

Repayments of borrowings totaled \$1.2 million and \$25.8 million for the three months ended March 31, 2013 and 2012, respectively. During the three months ended March 31, 2012, we repaid \$24.7 million of mortgage notes payable prior to their associated maturity.

During the three months ended March 31, 2013, we repurchased a total of 213,303 shares of our common stock under our authorized repurchase program for \$7.4 million. During the three months ended March 31, 2013, we also repurchased 114,561 shares of our common stock for \$4.2 million from employees in connection with a net share settlement feature of employee equity-based awards.

Stock Repurchase and Dividend Restrictions

Pursuant to the indentures governing our 8.375% Notes and our 7.625% Notes, and the agreements governing our senior secured credit facilities, our ability to repurchase shares of our common stock and pay cash dividends is limited. In accordance with such calculations, our ability to repurchase shares of our common stock and pay cash dividends was limited to \$72.6 million under these agreements as of March 31, 2013, with an additional \$10.0 million available to repurchase common stock only.

Pursuant to an authorization from our board of directors, as of March 31, 2013, we had remaining authorization to purchase up to \$42.6 million of our common stock.

Off Balance Sheet Arrangements

We had no off balance sheet arrangements during any of the periods presented other than those disclosed in Note 9 of our accompanying condensed consolidated financial statements.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Interest Rate Risk

We are exposed to market risk from changes in interest rates on a significant portion of our outstanding indebtedness. Based on \$634.8 million of total variable interest rate debt (including floor plan notes payable) outstanding as of March 31, 2013, a 1% change in interest rates could result in a change of as much as \$6.3 million to our annual other interest expense.

We received \$5.8 million of floor plan assistance from certain automobile manufacturers during the three months ended March 31, 2013. Floor plan assistance reduced cost of sales (including amounts classified as discontinued operations) for the three months ended March 31, 2013 by \$5.3 million and reduced new vehicle inventory by \$5.9 million and \$5.4 million as of March 31, 2013 and December 31, 2012, respectively. Although we can provide no assurance as to the amount of future floor plan assistance, it is our expectation, based on historical data that an increase in prevailing interest rates would result in increased floor plan assistance from certain automobile manufacturers.

Hedging Risk

We are party to an interest rate swap agreement which had a notional principal amount of \$19.4 million as of March 31, 2013. This swap was designed to provide a hedge against changes in variable interest rate cash flows through maturity in October 2015. The notional value of this swap is reducing over the remaining term to \$16.1 million at maturity. This interest rate swap qualifies for cash flow hedge accounting treatment and does not, and will not, contain any ineffectiveness.

For additional information about the effect of our derivative instruments on the accompanying condensed consolidated financial statements, see Note 6 “Financial Instruments and Fair Value” of the notes thereto.

In connection with the sale of our 3% Convertible Notes in March 2007, we entered into separate warrant transactions whereby we sold to Goldman, Sachs & Co. and Deutsche Bank AG, London Branch (collectively, the “Counterparties”) warrants to acquire, subject to customary anti-dilution adjustments, shares of our common stock at an initial strike price of \$45.09 per share, which was a 62.50% premium over the market price of our common stock at the time of pricing. As of March 31, 2013, the strike price was \$44.74 as a result of certain dividend payments. These warrants expire in a series of tranches through April 2013.

Item 4. Controls and Procedures

Disclosure Controls and Procedures

As of the end of the period covered by this report, the Company conducted an evaluation, under the supervision and with the participation of the Company's principal executive officer and principal financial officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures as defined in Rule 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the "Exchange Act"). Based on this evaluation, the Company's principal executive officer and principal financial officer concluded that as of the end of such period such disclosure controls and procedures were effective to ensure that information required to be disclosed by the Company in reports it files or submits under the Exchange Act is (i) recorded, processed, summarized and reported within the time period specified in the rules and forms of the U.S. Securities and Exchange Commission and (ii) accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding disclosure. Management necessarily applies its judgment in assessing the costs and benefits of such controls and procedures, which, by their nature, can provide only reasonable assurance regarding management's control objectives. The Company's management, including the principal executive officer and the principal financial officer, does not expect that our disclosure controls and procedures can prevent all possible errors or fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that objectives of the control system are met. There are inherent limitations in all control systems, including the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple errors or mistakes. Additionally, controls can be circumvented by the intentional acts of one or more persons. The design of any system of controls is based in part upon certain assumptions about the likelihood of future events, and while our disclosure controls and procedures are designed to be effective under circumstances where they should reasonably be expected to operate effectively, there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Because of the inherent limitations in any control system, misstatements due to possible errors or fraud may occur and not be detected.

Changes in Internal Control Over Financial Reporting

There were no changes in the Company's internal control over financial reporting during the quarter ended March 31, 2013 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II

Item 1. Legal Proceedings.

From time to time, we are and may become involved in various claims relating to, and arising out of our business and our operations. These claims may involve, but are not limited to, financial and other audits by vehicle manufacturers, lenders and certain federal, state and local government authorities, which relate primarily to (a) allegations of violations of manufacturer agreements or policies, (b) compliance with lender rules and covenants and (c) payments made to government authorities relating to federal, state and local taxes, as well as compliance with other government regulations. Claims may also arise through litigation, government proceedings and other dispute resolution processes. Such claims, including class actions, can relate to, but are not limited to, the practice of charging administrative fees, employment-related matters, truth-in-lending practices, contractual disputes, actions brought by governmental authorities and other matters. We evaluate pending and threatened claims and establish loss contingency reserves based upon outcomes we currently believe to be probable and reasonably estimable.

We currently do not anticipate that any known claim will materially adversely affect our financial condition, liquidity or results of operations. However, the outcome of any matter cannot be predicted with certainty, and an unfavorable resolution of one or more matters presently known or arising in the future could have a material adverse effect on our financial condition, liquidity or results of operations.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Pursuant to the indentures governing our 8.375% Notes and our 7.625% Notes, and the agreements governing our senior secured credit facilities, our ability to repurchase shares of our common stock and pay cash dividends is limited to \$72.6 million as of March 31, 2013, with an additional \$10.0 million available to repurchase common stock only.

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares that May Yet be Purchased Under the Plans or Program (in millions)
01/01/2013 - 01/31/2013	81,803	\$ 33.29	81,803	\$ 47.3
02/01/2013 - 02/28/2013	74,500	\$ 35.45	74,500	\$ 44.6
03/01/2013 - 03/31/2013	57,000	\$ 35.45	57,000	\$ 42.6

In December 2012, our board of directors authorized the repurchase of up to \$50.0 million in shares of our common stock, effective January 1, 2013. During the first quarter ended March 31, 2013, we repurchased 213,303 shares of our common stock for \$7.4 million. As of March 31, 2013, we had remaining authorization to repurchase up to \$42.6 million in shares of our common stock.

Item 4. Mine Safety Disclosures

Not applicable.

Item 6. Exhibits

**CERTIFICATION PURSUANT TO
RULE 13a-14(a)/15d-14(a) OF THE SECURITIES EXCHANGE ACT OF 1934
AS ADOPTED PURSUANT TO
SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002**

I, Craig T. Monaghan, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Asbury Automotive Group, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and we have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting;
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
